Content

- Objective of NESSI Norway

- History of the Norwegian initiative
 - 2006
 - 2007-2010

- Membership and organisations
 - The Norwegian branch

- Collaboration with NESSI

Objective of NESSI Norway

- To have some organisational body or special interest group on Software and Services; Stakeholders are:
 - Vendors
 - Users
 - Research

- To have a consortium of stakeholders who
 - Exchange ideas
 - Collaborate in specific short-, mid-, and long-term activities
 - Initiate new project ideas and proposals
 - Develop new university courses
 - PhD and MSc programs associated with the actual projects

History

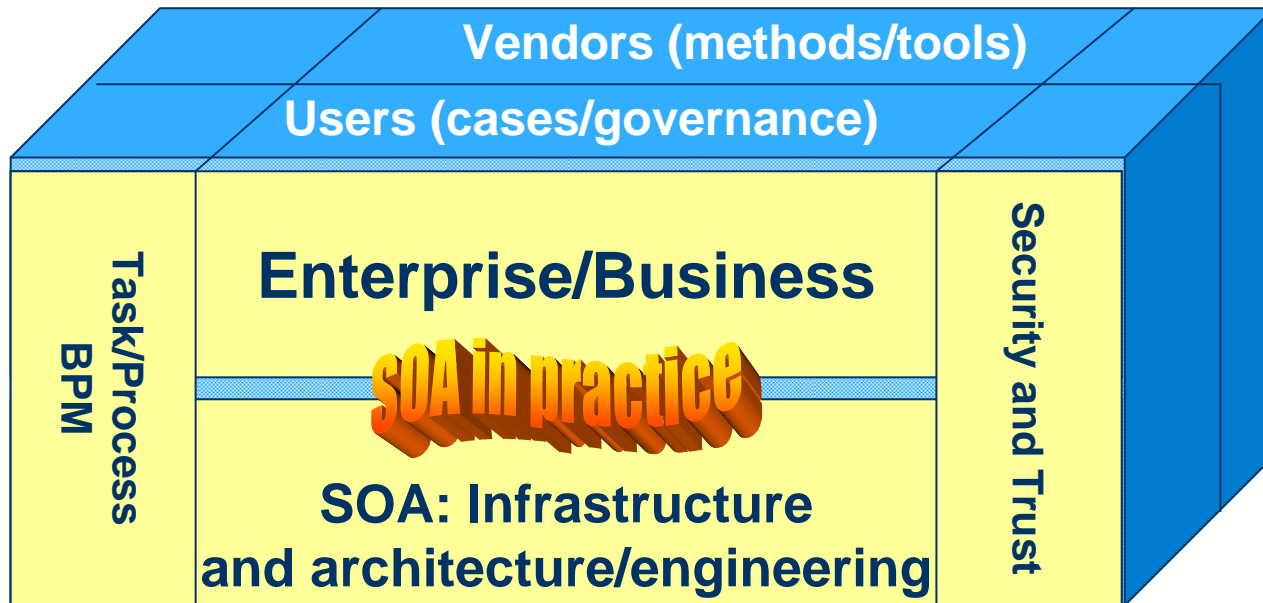

- 2006: NOSSI – Norwegian Software and Services Initiative
 - A project partly funded by the Norwegian Research Council (NCR)
 - SINTEF, Abelia Innovation, and ICT Norway.
 - Objectives were
 - Positioning in NESSI
 - Getting the Norwegian stakeholders engaged in NESSI
 - Prepare for the FP7

- 2007-2010: SOA-in-Practice
 - A national network project (also partly funded by NCR)
 - SINTEF has the lead
 - At the moment more than 35 organisations in the network
 - At our workshops / seminars there are more than 120 attendants
 - The project was evaluated May 2008, and it was
 - Overall objectives are:
 - Promote a national research agenda in Software and Services
 - Initiate national and international collaboration and projects
 - Being the pool of the most important Norwegian stakeholders in Software and Services

Membership and organisation

- NESSI Norway is at present a network of stakeholders in the area of SOA
 - It's operational through SOA in Practice, a network project
- More than 35 organisations are members of the network
 - Of which 12 are core members
 - Of which more than 50 people are engaged
- We're are organised by
 - SINTEF being the Project lead
 - Decision structure is based on the core members being most active
 - Any organisation or person can join the network
- Activities
 - Monthly meetings, or even more frequently
 - Experience/technology seminars and invited talks
 - Project initiations, one national project proposal already submitted
 - Several ongoing FP6 and FP7 EU-projects are linked to the network
 - Some alignment with NESSI WGs

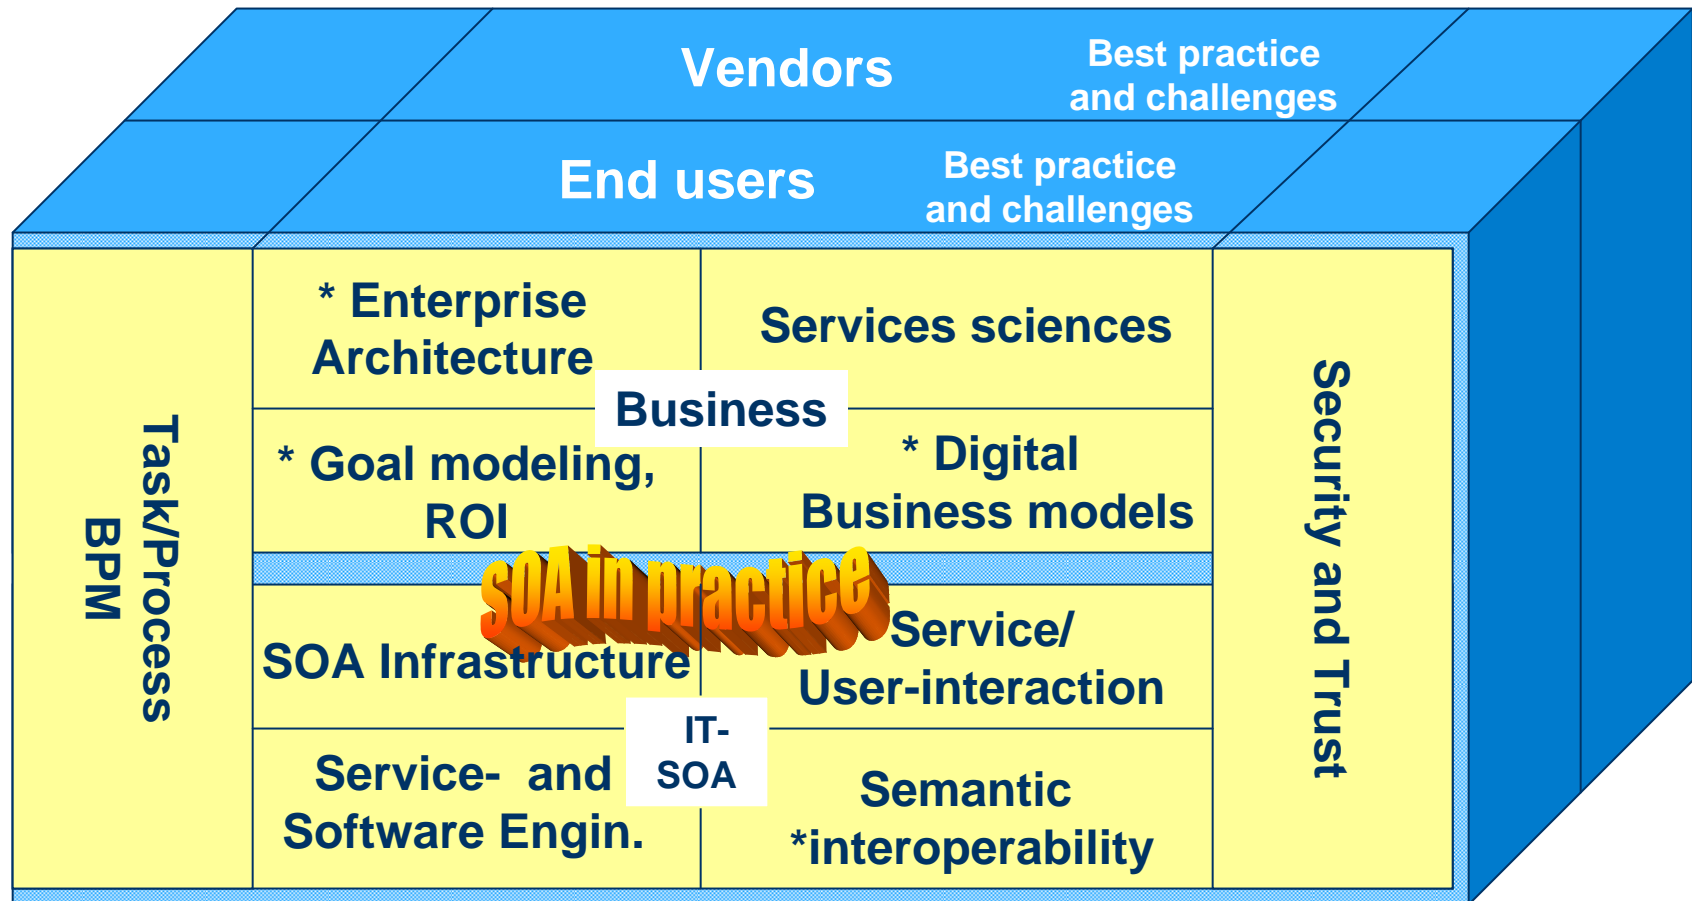

SOA-in-Practise

A Norwegian Network, with Experience, Research
and Technology forums

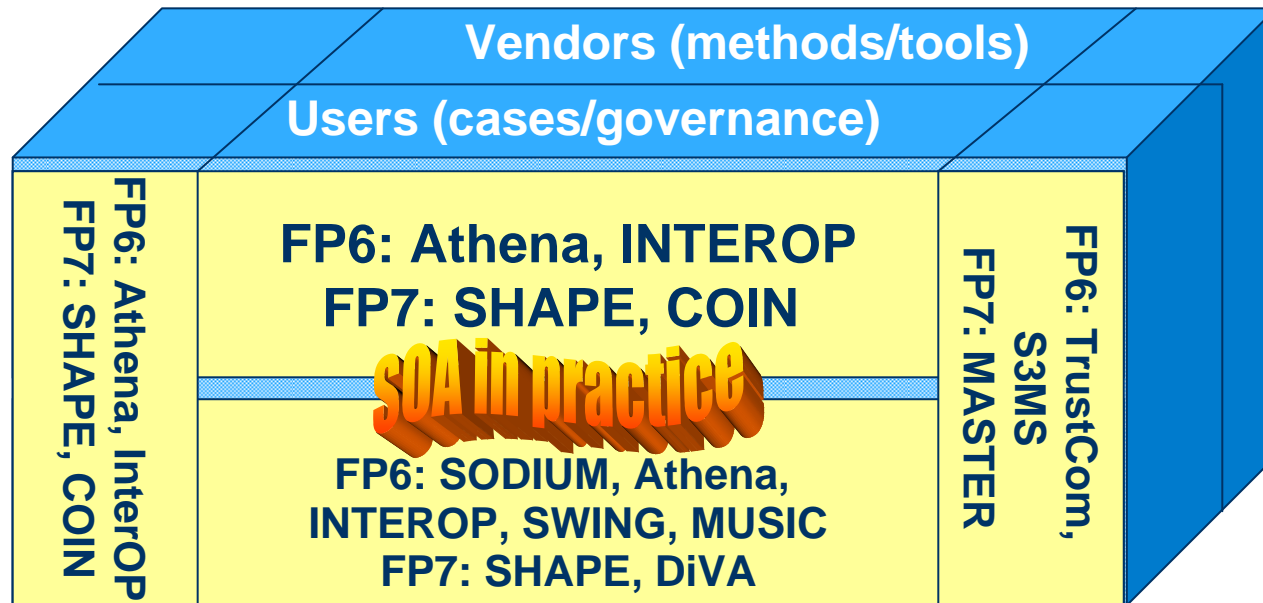

SOA in Practice SIGs and relations to NESSI WGs

* = SIGs with topics beyond NESSI WGs

Service and Software Engineering have been integrated into one group

SOA in Practice and relevant relations to some FP6 and FP7 projects

Thank you!
